

HotRot Screwtech Augers

- Preferred equipment for material transport.
- Fully contained prevent access by vermin and eliminating material loss and odour
- Pay for themselves in lower maintenance
- Fully manufactured and tested in the factory before shipping.
- Can operate in all weather conditions but heat tracing may be required in extreme cold climates.

Global Supplier

Global Composting Solutions is the global supplier of HotRot in-vessel composting systems which take the nuisance out of large scale composting.

Turnkey Solutions

It is ideal for organic waste composting at zoos, universities, resorts and remote site organic waste disposal e.g mining, oil and gas projects.

Integrated Solution

Where necessary Global Composting offers a complete integrated solution from waste collection, pre-processing and sorting, through to composting and end-product use.

Compelling Proposition

HotRot technology is simple to operate, requires minimal space, has low labour/maintenance requirements and is leachate free.
